## INDUSTRIAL **EXPOSITION**

May be Held in This City in Few Weeks.

WICHITA

Will be Exhibited to People of City and Vicinity.

Wichita may have a two week's exposition at an early date. Plans are being projected by a representative of the Industrial Exposition company and within to the manufacturers, jobbers and wholesale people of Wichita. Many of the larger cities, as well as other places having as many local industries as this city, are holding annually a two week's ex position indoors, of the products manufactured in their city. Manufacturers agents are also displaying their goods and in many Instances the jobbers' interests are included wherein certain lines of goods which they represent are dis-played, samples distributed and often demonstrators are sent to show to the public what can be done with certain brands of goods, as well as articles of a manufactured nature. The cream separator, incubator, washing machine., farming implement, cooking utensits, percals of various kinds, also pucking house products are displayed; coffee distributed in the cup, scaps, washing powders; also articles such as wagons, buggies, automobiles, bicycles, sporting goods, products of the soil, and thousands of other things that go to make up a full and complete line of such articles as are handled by the industries of which Wichits largely depends upon for a market and the patronage of the people in her vicinity and wholesale territory.

The date of such an exposition should be in the spring. Every merchant should be vitally interested. The retailer, as well as the wholesaler. The introduction of certain goods which have advantages over inferior articles should be demon strated to the public whom are the con ers. The wholesaler or jobber should enter into the movement for the benefit of their customers and the manufacturer likewise for the same reason of the good he will be doing the jobbers. The propo sition is not a new feature only, perhaps, for Wichita. The plan upon which it is conducted is almost self-supporting; it is co-operative and only needs a small outlay of money to prepare the exhibit. But it does need a large amount of interest and cooperation, with pienty of push and energy on the part of those the will enter their goods. All depends largely upon the amount of work put into the exhibition from the start.

The plan as outlined is a commendable one, casy to grasp, and the benefits and results can be seen readily by those intreating themselves after once having the plan conducting the exposition explained to them.

The Auditorium has been visited, and it may seem to be too limited in eize for a very extensive exhibit, it has many advantages for carrying out the plans for a very complete and successful

Except the heartrending cries of "Help," no mortal words strike human sympathy more deady, her more impenaltely command areas thou than the grateful words of one whose life has been suarched from the grave.

The following testimonial is a plain, honest to secure recruits. Heretofore the restatement, temperate in its language because of the very death of feeling of the one who writes it. It tells its own strong story.

pate in the benefits that will be derived from the financial resources. One of the very newest and most unique as well as novel features that can be added to the program, is a 'trip around the world.' wherein customers of merchants can be invited to go on an extensive tour after coming to Wichita. A promise can be fulfilled that England, Ireland, Scotland, France, Germany, Switzerland, Spain Italy and Old Mexico and other countries will be shown to them in all their charac teristics, habits, as well as the food of each country served in some menu de-cided upon daily by the different nation-

alities represented. The revenue obtained from this source has proven to be very remunerative to several organizations in other cities where it has been made a grand success. Every organization in the city has an opportunity to become interested that esires to take part and all the mone; each organization receives is their sole property. So that it sometimes depends upon competition and a spirit of rivalry as to who may get the largest patronage. Though every passenger who starts or the trip around the world must go all the way or forfelt his or her return money. The tast night of the exposition winds up the affair with a grand ball and confetti battle; plenty of music is one of the principal features that will be on the

The company secures the cooperation of the bus-iness men and start the thing going. They to not ask for contributions from merchants or any one. They sell space for exhibits and privileges and furnish the intertainment. The plan has been tried in many cities in the country and in every instance it has been found a paying nvestment to all who go into the work The expense is small and the money received from space sales will meet the entire expense of the exposition and a small charge is made at the door which the ompany receives for directing the affair. For a number of days the company's representative has been in the city calling on the business men and all have given him the greatest encouragement and it is expected that within ffew days some definite announcement will be made to start the ball rolling for an exposition of Wichita goods within the next few weeks.

YOUR MONEY RETURNED If Hyomei Does Not Cure You of Catarrh, Says Your Druggist.

In advertising that he will refund the noney to any one purchasing a Hyome outfit who can say that it has done them no good in the treatment of catarrh, your druggist means exactly what this guarantee says.
